Continuation of Herd Dispersal. For nearly 100 years the Parsons family have milked at West Yeomadon with Andrew taking over the running of the dairy in 1991. In 2006, Andrew's son Mark came home to work on the farm and both Mark and Andrew have farmed in partnership ever since. The herd is run on a grass based, low input system consisting of silage fed in troughs and cake in the parlour. The herd calves all year round and this first consignment consists of the spring and summer calving portion. The breeding policy has always been to produce strong, well-balanced cows with excellent legs and feet which are capable of producing good volumes of high quality milk. The herd is BVD, IBR and Lepto vaccinated and Johnes screened.

The herd is averaging 8219Kgs 4.36%BF 3.43%PTN with a whole herd scc of just cc124.
