FOREWORD

Kivells are pleased to receive instructions on behalf of the Johns Family to disperse the fresh and summer calving portion of their herd. The herd was first established in 1961 when Colin and Christine Johns moved to Venn farm from Newton St Petrock. Ian and Jacqui Johns took over the management of the farm in 2000. The family have decided to have a change in farming policy and the cattle for sale on Wednesday 28th August will be the first consignment of this dispersal.

The herd is mostly homebred, however some select purchases have been made at both weekly markets, as well as dispersal sales through Holsworthy Livestock Market. The cows are milked twice a day through a herringbone parlour and cubicle housed in the winter months. The herd is grazed night and day from April till October with concentrates fed through the parlour and bunker fed grass silage in the winter months. (No TMR).

The sale includes a number of Montbeliarde x, Swedish red x as well as red and white Holstein Cows and Heifers. The breeding policy has always been to produce strong, well-balanced cows with excellent udders and longevity to produce high component milk. The cows are served to Holstein Friesian sexed semen and Aberdeen Angus. The home-bred heifers are progeny of the best cows in the herd.

The herd is not vaccinated but monitored for BVD, IBR and Lepto with no known cases. The herd is Johnes screened and all cows offered for sale have tested negative.

The herd is NMR Recorded with a Herd Average of:

8741Kgs 4.58%BF 3.52%PTN cc150.

Average cell count of cows in the sale cc44.

Auctioneers Comments:

Ian and Jacqui Johns have been great supporters of Kivells dairy sales for many years and will be greatly missed around the ring. This sale presents a fantastic opportunity to purchase quality commercial cows suitable for a whole range of dairy systems. A real attraction of the sale will be the Montbeliarde x and Swedish Red x Cows and Heifers which have been used to enhance the profitability of the herd to great success.

Kivells

Harpers Feeds Comments:

Ian, Jacqui, and Mark have successfully bred a high-performing herd of cows, meeting the requirements of their Saputo contract. The cows are producing an impressive 8,700 litres of milk per year with 4.58% butterfat and 3.52% milk protein. The average feed rate is 0.33kg per litre, resulting in an average daily output of 29kgs.

Cows at this farm are milked twice daily and have access to grass silage outside. The feeding system is straightforward and ensures that the cows are never underfed. As a result, the cows are in good condition, which aligns with the old adage "fat cows, fat milk." This management approach contributes to the overall health and productivity of the herd.

Ian's herd includes a mix of red and white cows, reflecting his preference for variety. The peak yields of C21 computer on parlour cows are 40kgs, while heifers produce approximately 32 kgs.

Glen Johns - Harpers Feeds
