FOREWORD

Michael and Joanne Wade and their son Rob have decided to retire from dairy farming and as a consequence their entire **LOFORD** herd of Holsteins will be sold in Exeter Livestock Centre on October 11th.

This is a truly exceptional catalogue, with a depth of pedigree that is seldom seen in any sale. No fewer than **37 Excellent cows** are to be offered with a further **37 being Very Good (including 14 VG 2yo)**, and the handful that remain being either Good Plus or fresh heifers not yet classified. Virtually the whole herd is bred from between 5 and 16 generations of Ex or VG cows. **There are 9 cows who are between the 6th and 12th straight Excellent generations, and over 30 animals are bred from 5 or more generations Excellent.** In view of these impressive statistics it is not surprising that the Loford herd has been awarded **Master Breeder** status.

The foundation for these splendid pedigrees arrived by way of the purchase of American embryos from the famous **Brigeen, Budjon-JK, Henkeseen, Markwell, Plushanski, Regancrest** and **Wilsondale** herds, augmented by purchases from such well known UK herds as **Berryholme, Corringham, Holmead, Lansen, Moorshard, Sahara, Sterndale, Willsbro** and **Wiltor**.

Noted families in the sale include **Ambrosia, Chassity, Dellia, Elegance, Fifi, Flo, Ghost, Gloria, Lausine, Lila Z, Lustre, Marci, Moxy, Rae, Raven, Rhonda, Rose, Roxy, Sharon** and **Shower**.

The herd is housed in cubicles and fed on a basic TMR ration containing maize silage with blends, topped up in the parlour. **The current rolling average for the herd which has exceptionally good constituents for fat and protein is 9,841kg 4.48% (3.42.).**

Many noted proven sires are represented by daughters in the sale, with Bullseye, Chief, Davinci, Lambda, King Doc, Lemagic, Legend, Pepper, Ryder, Sidekick and Showtime appearing frequently in the catalogue as sires or service bulls. The majority are carrying calves to sexed semen.

Plenty of animals will have calved in the six weeks prior to the sale, with more due through the autumn and winter months including a number of promising heifers.

Seldom can a catalogue have been issued for a dispersal of a herd containing such deep pedigrees and so many outstanding individuals and discerning breeders should make every effort to be at Exeter on October 11th or to tune in on Marteye.

Penbode Farm Vets

It has always been a great pleasure to assist Mike and Rob with the veterinary care of their fabulous herd of cows for the past 20 years. Through the highs and lows, both on and off the farm, what always shines through has been their passion for cows. They have constantly strived to breed a better animal, and to give their top quality livestock the standard of care they deserve.

I carry out regular herd health visits to the farm and we monitor the health status of the herd using bulk milk samples.

The latest bulk milk antibody quarterly test (6/9/2024) results were:

- BVD Negative
- Leptospirosis Negative
- Salmonella Negative
- Liver Fluke Negative

The latest bulk milk BVD virus PCR test (5/9/2024) result was:
Negative

The herd is monitored for Johnes disease on individual cow milk samples and managed accordingly. I have never seen a clinical case of Johnes disease in this herd.
